800 3662

ADNOC Service Stations
Breakdown & cooling checks

800 300

Private recovery firms also operate 24/7. Save one number before summer.

IF YOUR CAR OVERHEATS — 6 STEPS

1 Turn the AC off, heater to full hot.
Pulls heat off the engine.

2 Pull over safely, hazard lights on.
Get onto the hard shoulder.

3 Switch the engine off.
Stops heat straight away.

4 Wait 15–30 minutes to cool.
Longer in peak heat.

5 Top up coolant only when cool.
Never while hot.

6 Call recovery if it climbs again.
A returning fault is real.

Never open the radiator cap while the engine is hot.

Boiling coolant sprays out under pressure. Wait until the engine is cool to the touch.

TYPICAL COOLING-SYSTEM REPAIR COSTS (AED)

Standard cars. Premium and luxury run higher. Fix small faults early — they cost the least.

Coolant top-up / flush

AED 150 - 400

Radiator replacement

AED 800 - 2,000

Thermostat replacement

AED 300 - 600

Water pump

AED 800 - 1,500

Radiator fan / motor

AED 400 - 1,200

Head gasket

AED 2,500 - 8,000
